EDUCATION

University of Central Florida | Burnett Honors College
BA in Digital Media (Web Development Track), Minor in Spanish (GPA: 3.9/4.0)

May 2026

SKILLS

Languages & Frameworks: Python, SQL, PHP, JavaScript, React.js, MaterialUI, HTML, CSS, Bootstrap, Vercel, Netlify
AI & Tools: Claude Code, MCP AI Workflow Automation, Docker, Linux/WSL, Git/GitLab, Jira, Flask, SmartSheet, Figma

PROFESSIONAL EXPERIENCE

AI Engineer | MDI **May 2026 – Present**

- Built a Python API integration pipeline using GitLab CI/CD, Docker, and systemd automation on a daily schedule to track **1,000+ weekly files**, improving operational visibility while reducing manual data reporting errors
- Developed a Python automation service leveraging Smartsheet and DocuSign APIs, webhooks, and dynamic document generation to streamline contract creation and **reduce processing time by 66%**
- Led AI education initiatives for developers and non-technical employees, delivering training on prompt engineering, AI productivity tools, MCPs, AI-assisted development workflows, and secure AI practices

Coding Instructor (Web Development) | Florida Film & STEM Academy **Jan 2026 – Present**

- Mentor students ages 10 – 17 on web development fundamentals like HTML/CSS/JS via project-based learning
- Provide one-on-one technical support, debugging assistance, and code reviews, reinforcing fundamental web skills

Strategic Communications Intern (Front-end Engineer) | NASA **May 2024 – Aug 2025**

- Designed and developed 8 internal web pages using **Figma, AngularJS, and Bootstrap**, for a dynamic and **responsive** website used by **500+** employees; received **G.E.M award** for “Going the Extra Mile” on this project
- Collaborated with stakeholders and leadership to gather requirements and deliver user-centered digital solutions, improving usability across internal communication platforms and employee resources
- Led facility tours and outreach initiatives, communicating complex aerospace concepts and machinery through accessible technical explanations for a wide range of audiences

Document & Media Assistant (Design & Workflow Automation) | Siemens Energy **May 2023 – Dec 2023**

- Engineered automated Smartsheet workflows and dynamic web forms to streamline data intake, improving operational efficiency by **30%**
- Developed technical documentation and automated presentation workflows to improve internal processes and communication

LEADERSHIP EXPERIENCE

President, Design & Code | UCF **May 2024 – May 2025**

- Hosted web development workshops on Figma, CSS, and Bootstrap, with live coding demos for student developers
- Led a team of 7 officers in coordinating events, managing resources, and ensuring effective team communications
- Expanded club partnerships within the tech community, fostering networking and learning opportunities for students

PROJECTS

Urban Lens | ReactJS, MaterialUI, Supabase, Docker, Vercel **Aug 2025 – May 2026**

- Engineered a full-stack web application to aggregate and filter cost-of-living data across 100+ cities within the US
- Implemented Supabase relational schemas with user authentication and row-level security (RLS), and CRUD functionality for a secure discussion board
- Containerized the application using **Docker** for consistent development environments and dependency management

Milky Way Cafe | ReactJS, CSS, Context API, Model Context Protocol (MCP), Vercel **Feb 2026 – Mar 2026**

- Designed and developed a ReactJS website with an interactive calendar and dynamic shopping cart using React Context API for global state management
- Ensured application reliability by implementing 27 unit and integration tests (Vitest, React Testing Library) covering user interactions, state management, and accessibility
- Integrated a custom MCP server to generate AI imagery, emphasizing modern AI-assisted development workflows
